Business Edition

Managed Solution delivers the most comprehensive cloud solutions.

If you find your company falling into any of these scenarios. Managed Solution can assist you in your next steps! Let's dive deeper into the benefits of Azure as well as determine if it is the right move for you!

AZURE QUICK START CLOUD PROJECT

The Azure Quickstart is customizable to your needs!*

Benefits of implementing an Azure Quickstart:

- A clearer understanding of how Azure maps to your existing IT services.
- Identification of specific services to pilot in Azure.
- A plan for evaluating Azure suitability for these services.
- A working POC/Pilot environment for a single workload/service.

*Price reflects stock Statement of Work (SOW), for work outside of the scope reflected here will result in changes in price.

Azure Briefing and Service Planning for 1-2 days:

- Explore all Azure services.
- Map Azure services to your workloads and opportunities.
- Prioritize workloads that can move to Azure.
- Plan for evaluating and deploying Azure on specific workloads.

Azure POC/Pilot build out for 3-5 days

*This will be per service/workload.

- Plan integration of Azure into your governance model
- Security
- Operations
- Management
- Self-Service
- Phased approach for delivering Azure services

Azure governance workshop for 3-5 days

**Microsoft funding for this POC/Pilot may be available on a limited basis otherwise customer is responsible for this portion of project.*
