# ACCELERATE PRODUCTIVITY!

## Business Edition

Managed Solution helps customers digitally transform their organization through Office 365

Empower your workforce with the tools they need to stay productive everywhere they work: in the field, on the road, and from home. Managed Solution's role will be to provide the overall project delivery and design, this helps keep Managed Solution project hours minimized while working with both your team & Microsoft to complete the project.

## OFFICE 365 MIGRATION ACCELERATOR: STATEMENT OF WORK

In this phase, the Customer requirements are understood, the current infrastructure is evaluated, and a design for the implementation to an Office 365 environment is created. A review of the design is conducted with and approved by the Customer Team prior to any changes in configuration.

OFFICE 365  
Migration Project

The built environment is turned over to the client with a specified amount of knowledge transfers. The results of the testing are also reviewed during this phase.

DESIGN

BUILD

TEST

DEPLOY

In this phase, the actual "implementation" is executed. This phase would include setup and configuration of the Office 365 environment.

Test plans for verifying the functionality of the Office 365 environment are written and executed to verify that the built environment performs as expected under various conditions. Results of the tests are captured for review.
